1 Props 실습

1 Props 실습

Props를 만들어 보세요!

Component

```
import React, {FC} from 'react';

interface Props {
    value: number
}
const Square: FC<Props> = () => {
    return (
        <div>
        </div>
    );
};

export default Square;
```

Component Test

```
import React, {render, screen} from '@testing-library/react';
import Square from "./Square";

/*
prop
 */
describe('props test', () => {
    it('Square    .', () => {
        render(<Square value={10}/>);
        const subject = screen.getByText(/10/i);
        expect(subject).toBeInTheDocument();
    });
});
```
